DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-5, 9-12, 34 and 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Muller. Muller shows the use of a vehicle seat having a backrest with a head restraint arranged thereon. A spreading lever device (24,25,39,40) is arranged between a front (45) and rear (26) part of the head restraint. Muller further discloses that at least one driving device actuates the spreading lever device in response to a vehicle impact (see Col. 3 lines 42-60). The spreading device comprises first and second levers pivotably connected at a respective linkage point.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muller.

Muller shows all of the teachings of the claimed invention except the use of an electric motor as a driving device. It would have been an obvious matter of design choice to modify the drive device of Muller with an electric motor since applicant has not disclosed that a motorized drive device solves any stated problem and it appears that the drive device of Muller, would perform equally well.

Allowable Subject Matter

5. Claims 23-24,26-30 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 10/14/03 have been fully considered but they are not persuasive. In response to applicant's argument. "that the swiveling levers are attached to the headrest at only one end", the examiner is of the opinion that the headrest so far as defined -of

Muller constitutes both the frame portion (26) or rear part of and the head restraint (45) or front part. Consequently, the swiveling levers are connected at first and second end thereof, to the headrest and the front part is connected to the rear part "along a horizontal rotational axis" (27).
